# Product Differentiation

Mini-Amazon, IG7

Authors: Haohong Zhao (hz147), Yifan Li (yl506)

Additional Features:

1. **Timing**: When a user queries an order, a detailed order status information is shown and different timestamps were recorded, including the time when the order was created, the time when packages were packed, the time when packages were loaded, and the time when packages were delivered.

2. **Cart**: On the index page, the user is able to search for a product based on input specified in search bar. The results are shown dynamically and the user can specify the amount of each product to purchase. On the bottom of the index page, the user can click "Clear cart" button to quickly clear the amount entered before placing the order.

3. **Confirmation Email**: Once the order is placed by a user, a confirmation email will be sent to the email address entered by the user.

4. **Query / Cancel Order**: The user can query the detailed status of an order and cancel an order by clicking the corresponding buttons on the navigation bar. Notice that the order is not cancelable once it has been packed, so please change simspeed accordingly when testing.

5. **Change Destination**: The user is able to specify a new delivery address on Amazon web, as long as the order status is not yet delivering or delivered. Remember to change simspeed accordingly when testing.
